Re: Application for Change under Ground Water Certificate No. 914-D

Dear Ms. Bateman:

In response to your request, you are hereby granted an extension to put the water to full beneficial use for the reason(s) below:

In review of your request for extension, it appears you have completed installation requirements and construction of your project. You have put a portion of your water right to use. Your request is for a reasonable and short period of time. We will grant you an additional two years to plant your land in pasture and put the water right to full beneficial use. According to the information provided this will complete your project.

The new deadline to submit your *Proof of Appropriation of Water* is December 1, 2013.

An approved measuring device shall be installed and maintained for each of the sources authorized by this water right in accordance with the rule "Requirements for Measuring and Reporting Water Use", WAC 173-173. <http://www.ecy.wa.gov/programs/wr/measuring/measuringhome.html>

Water use data shall be recorded weekly and maintained by the property owner for a minimum of five years. The maximum monthly rate of diversion/withdrawal and the monthly total volume shall be submitted to the Department of Ecology by January 31st of each calendar year.

WAC 173-173 describes the requirements for data accuracy, device installation and operation, and information reporting. It also allows a water user to petition the Department of Ecology for modifications to some of the requirements.

Department of Ecology personnel, upon presentation of proper credentials, shall have access at reasonable times, to the project location, and to inspect at reasonable times, records of water use, wells, diversions, measuring devices and associated distribution systems for compliance with water law.
